

EDUCATION

Sri Eshwar College of Engineering	B.E CSE(AI&ML)	CGPA: 7.2 (upto 5th sem)	2023-2027
ELGI Matric Higher Secondary School	HSC	77.7%	2021-2023
ELGI Matric Higher Secondary School	SSLC	100%	2020-2021

INTERNSHIP

MERN STACK – G-ZOFT TECH SOLUTIONS

2024

Developed a Blood Donation web application to check the real-time availability of specific blood groups. The system provides users with the location of the nearest hospital or blood bank where the required blood type is available, aiming to connect donors and recipients efficiently through a centralized Dashboard.

Tech stack: CSS, JavaScript [React JS, Node JS, Express JS], MongoDB

PROJECTS

DocMind-RAG Powered Document Intelligence System

Developed an end-to-end **RAG-Powered Document Q&A system** that allows users to upload PDF documents and ask natural language questions to extract precise, grounded answers. The platform uses semantic chunking and FAISS vector search to retrieve the most relevant content, feeding it to a Groq LLaMA 3.1 LLM for context-aware responses with source citations to minimize hallucinations — served via a FastAPI backend with a Streamlit dashboard for an intuitive user experience.

Tech stack: Python, FastAPI, Streamlit, FAISS, Sentence Transformers, Groq LLaMA 3.1, PyMuPDF, NumPy.

AI-Based AR Simulation Using Computer Vision and GenAI

Developed An end-to-end Retrieval-Augmented Generation system that allows users to upload PDF documents and ask natural language questions to extract precise, grounded answers. The platform uses semantic chunking to break documents into meaningful segments and FAISS vector search to retrieve the most relevant content — which is then fed to Groq LLaMA 3.1 for context-aware responses with source citations, minimizing hallucinations. The entire system is served via a FastAPI backend with an intuitive Streamlit dashboard for seamless user interaction.

Tech stack: Python 3.11, FastAPI, Uvicorn, Streamlit, FAISS, Sentence Transformers, Groq LLaMA 3.1, PyMuPDF, NumPy .

MUSIC GENRE CLASSIFICATION

Utilized Convolutional Neural Networks (CNN) with TensorFlow in Python to innovate music genre classification. Designed a user-friendly interface with Streamlit, highlighting my expertise in advanced Python programming, machine learning, and UI design to deliver impactful solutions.

Tech Stack: Python, CNN, Streamlit .

INTELLICHAT:AI POWERED REAL TIME MESSAGING PLATFORM

Developed IntelliChat, an AI-powered real-time chat application using React, Node.js, and MongoDB. Implemented secure authentication, real-time messaging with Socket.io, and advanced features like AI chatbot.

Tech Stack: React,Tailwind css,Node.js,Express.js,MongoDB,GorkAPI,Vercel,Render.

CERTIFICATIONS

Certified in introduction to Data Analyst	Simplilearn	2025
Certified in java	Udemy	2024
Certified in Introduction to MongoDB	ICTAcademy	2023

ACHIEVEMENTS

Skill Rack - Problems Solved: 250+	2024
Amirta Vishwa - Participated in IDEATHON'24 at Anokha.	2024

SKILLS

Programming Languages	C Basic C++ Java Python.
Web Technologies	HTML CSS JavaScript [React JS, Node JS, Express JS]
Database	MySQL MongoDB.
Technical	Machine Learning Data Structures and Algorithms OOPS
Tools	VScode Jupyter Notebook Excel Figma Canva GitHub
