

EDUCATION

BE-CSE–Sri Eshwar College of Engineering(7.4 till Semester 5)	2023 – 2027
HSC– Narayana Olympiad School (66.5%)	2021 – 2023
SSLC– Narayana E-Techno School	2020 – 2021

INTERNSHIPS

MERNSTACK - RAMPEX Technologies 2025

Completed a one-month MERN stack internship covering both frontend and backend development. Built two full-stack projects using React.js and MongoDB, and deployed them on Render and Vercel.

CLOUD COMPUTING INTERNSHIP - VSPHERE Technologies 2025

Completed a cloud internship focused on AWS services and container fundamentals. Gained hands-on experience with EC2, Auto Scaling, RDS, S3, IAM, and basic Docker functionality. PROJECTS AND HACKATHON Cloud-Based Healthcare Scheduling Platform

PROJECTS

[Cloud Notes API](#) 2025

A cloud-based notes management system built to safely store and manage user data. The application focuses on secure access, reliable data handling, and smooth deployment to the cloud. It supports creating, updating, and managing notes while ensuring only authorized users can access their information. The project highlights real-world backend structure, data safety practices, and automated deployment workflows. **Tech Stack:** Node.js, Express, JWT Authentication, MongoDB Atlas, GitHub Actions, Vercel

[Serverless Task Management System](#) 2026

A cloud-based task tracking system designed to handle tasks efficiently without relying on always-running servers. The application allows users to create and view tasks while automatically tracking completion trends in the background. It is built to scale smoothly with usage, remain cost-effective, and be easy to recreate or deploy again. This project highlights modern cloud design principles and real-world approaches to building reliable, scalable systems.

Tech Stack: AWS Lambda, API Gateway, DynamoDB, DynamoDB Streams, AWS SAM

[FitPulse](#)

A web-based fitness and calorie tracking platform that helps users understand their daily health needs. The application collects basic personal details to provide personalized fitness and calorie suggestions in an easy-to-use interface. With a clean, responsive design and instant feedback, FitPulse makes health planning simple, practical, and approachable.

Tech Stack: React (Vite), Python

CERTIFICATIONS

[AWS-Foundational- Practitioner](#) AWS Services 2025

Project Management and Agile Fundamentals | **Santander Academy** 2025

SKILLS

Backend and APIs– JavaScript (Node.js) | Express.js | RESTful API Design

DevOps and CI/CD – CI/CD Pipelines | Automated Deployment | ESLint | EVM | JWT

Tools –VScode | Git | GitHub | Vercel | MongoDB Atlas | Postman | AWS Console

Management Skills – Agile Methodology | Scrum Framework | Sprint Planning
